Cross-sectional subject

Diversity, inclusion, gender, interculturality, multilingualism, impairment.

Main focus – modules to chose

Aesthetic learning: Visual and performing arts, music, literature, media, dance and theatre are used to express one's own creativity and to enable the development of talents and potentials.

Social learning: Central questions are, for example: How do people organise their lives together in the past, today and in different cultures? What opportunities are there for participation and active involvement in social life and school life?

Health and life skills in schools: The focus is on the development of the individual as well as the school community and the promotion of physical and mental health.

Natural science and technology: The aim is to promote children's interest in connections between nature, technology, everyday life and the conditions of the professional and working world.

Inclusive education: Children and young people with special needs and special educational needs should be enabled to participate actively in our free and equal society.
