

Institute for Subject Didactics and Subject Sciences

The Institute for Subject Didactics and Subject Sciences comprises various subject areas of primary and secondary didactics as well as the educational laboratory project "Didactic Workshop".

Teaching staff from subject didactics and subject sciences areas are assigned to the Institute for Subject Didactics and Subject Sciences.

The central goals of the Institute are to develop the training of educators in the field of subject didactics and subject sciences, such as

- Coordination of teaching in the teacher training programme at primary level
- Coordination of teaching in the teacher training programme at secondary level with other institutions in the region of Salzburg.
- Implementing measures for the professionalisation of teaching in the subject didactics (e.g. through in-service training events for university teachers, expert discussions, networking with the practical schools, cooperation with the Institute for Professional Development and School Quality)
- Collaboration in the development of new training curricula
- Promotion of Austrian and international networks of teachers in the training programme
- Drawing up staff development plans in cooperation with the responsible vice rector
- Development, implementation, stimulation and coordination of subject didactic research and development at the University of Education Salzburg Stefan Zweig
